

CATEGORY : DAMPING PADS

SERIES RCR

DESCRIPTION

- Pads are designed to reduce problems in industry caused by vibrations and structure noise. Cork with rubber pads on either side provides additional isolation and excellent grip.
- Alternate high-low rib construction.
- Excellent sound attenuation capability.
- Simple field installation.

APPLICATION

- Where bolting is to be avoided.
- Minor, non-critical vibration conditions.
- Used for pumps, motors, AC units, generators, etc.
- Recommended for acoustic problem applications.

NOTES

- Low density cork between neoprene rubber.
- Working range from 15 to 55 lbs/square inch.

model	product name	thickness (in)
RCR	Rubber cork rubber	$\frac{7}{8}$

size (in)	rated load (lbs)
2 x 2	200
3 x 3	450
4 x 4	800
6 x 6	1800
12 x 12	7200
18 x 18	16 000

NOTE : Research and development is a continuous process with us as improvements are made from time to time, specifications/ dimensions may change without notice. Tolerances in dimensions are as per international standards.
